EDUCATION

- Indian Institute of Information Technology Vadodara ICD** Diu, India
 - Bachelor of Technology - Computer Science and Engineering; GPA: 7.07* Nov 2022 - Present
 - Relevant Courses: Database Management Systems (DBMS), Algorithms, Operating Systems, Software Engineering, Data Structures, Computer Networks.

SKILLS

- Languages : C, C++, JavaScript, TypeScript, Python, SQL
- Frontend : HTML, CSS, React.js, Nextjs, Tailwind CSS, Zod
- Backend : Node.js, Express.js, REST APIs, JWT Authentication, Clerk
- Database : MongoDB, RedisDB, MySQL, Mongoose, Prisma
- DevOps & Others : Git, GitHub, Docker, Communication skills, analytical thinking, logical reasoning

EXPERIENCE

- SapmenC** Remote
 - Fullstack Software Developer (Internship)* Feb 2025 – July 2025
 - Developed an invoicing system in **Upshot** with CRUD operations, email delivery via **Nodemailer + Mailtrap**, and real-time analytics using **Recharts**, streamlining billing for **100+ users**.
 - Built an e-commerce admin panel with **JWT authentication**, product CRUD, and media handling via **Cloudinary + MongoDB**, cutting admin effort by **60%**.
 - Increased brand-influencer engagement by **45%** through a campaign platform with role-based dashboards, progress tracking, and real-time insights for **200+ users**.
- NxtWave** Online
 - Teaching Assistant (Python Programming)* Jul 2024 – Oct 2024
 - Resolved **297+** Python-related queries for **194+ CCBP learners**, improving conceptual understanding and problem-solving skills in an online setting.

PROJECTS

- JustDo**   April 2025 – May 2025

Full-Stack To-Do App — React, Node.js, Express, MongoDB, Docker, Redis

 - Developed a full-stack to-do application with **user authentication, authorization, and CRUD operations**, providing secure task management for **100+ users**.
 - Optimized API performance by reducing latency from **128ms** to **8ms** through **Redis caching**, achieving a **15x** backend speed boost.
 - Containerized and deployed the application using **Docker**, applying the **MVC architecture** for maintainability and scalable growth.
- ChatNovaAi - Real-time MultiLingual Chat App**   Dec 2024 - Jan 2025

Full-Stack Web Application (Hackthon Project -1st)

 - Developed a real-time multilingual chat application using **React** for the frontend and **Node.js, Express, MongoDB** for the backend, leveraging **Socket.io** for real-time communication.
 - Integrated **Groq API** for dynamic language translation, enabling seamless communication between users of different native languages.
 - Implemented secure user authentication with **JWT**, and designed an efficient database schema to handle translated messages in real-time.
 - Optimized frontend performance by managing state carefully, reducing unnecessary re-renders, and ensuring smooth real-time chat experience.
- Food Recipe App - MealMate**   Oct 2023 – Dec 2023

Full-Stack Web Application (Team Project)

 - Engineered a full-stack recipe application using **HTML, CSS, Bootstrap, JavaScript**, with backend functionality powered by **JWT authentication** and **REST APIs**, adhering to the **MVC architecture**.
 - Executed and validated **CRUD operations**—Login, Logout, Register, and Edit Profile—delivering a secure and intuitive user experience.

HONORS AND CERTIFICATES

- Runner-Up, **Hack IIITV 2023** — Built a functional prototype in a 24-hour sprint at IIIT Vadodara (Mar 2024).
- Responsive Web Design Certificate** — Nxtwave Certificate
- Fundamentals of Deep Learning Certificate** — NVIDIA Certificate
- Model Context Protocol (MCP)** — Mega Workshop — Nxtwave Certificate
- Building & Deploying Apps on AWS** — Mega Workshop — Nxtwave Certificate
